STAND FAST

BUILDING SYSTEMS INC.™

At Stand Fast Building Systems, Inc., we take the time to design and fabricate our buildings right. We use top quality standard products, such as galvanized purlins and girts, so that Stand Fast Buildings can better withstand extreme weather, cost less to maintain, last longer and provide a low life-cycle cost to building owners.

To ensure customer satisfaction, we guarantee cost predictability and quality products. While we strive to be the low cost producer, Stand Fast consistently ranks high with regard to industry standards in terms of product quality.

Stand Fast believes service is our most important product. Without great service, even the best products result in problems for the purchaser. Excellent quality service is the main focus of our company, yielding low costs and satisfied customers.

COMMERCIAL

Stand Fast Building Systems, Inc. can supply the perfect custom or prefabricated steel building for a giant office complex or a small retail store.

Size is never an issue, unlimited lengths and widths are available. Engineers keep flexibility in mind in the design of each building allowing easy expansion as a business grows. Stand Fast Building Systems, Inc. are fully customizable to specific building requirements. Our steel buildings provide vast amounts of open floor space and can customize a building to accommodate your business for whatever is needed including offices, conference rooms, space for cubicles, restrooms, kitchens and more.

Steel building construction is cost effective and significantly reduces traditional construction costs and time. Stand Fast Building Systems, Inc. meet or exceed local building requirements for snow, wind and seismic conditions and are engineered to adhere to Florida's strict wind requirements.

INDUSTRIAL

Whether it is a new manufacturing facility, the expansion of an existing business or an industrial warehouse that is required, Stand Fast Building Systems, Inc. offers options to fit any need.

We utilize the highest grade US steel in the manufacture of their extremely durable steel buildings, which can withstand years of heavy use.

A variety of ceiling lights, sky lights, insulation, windows and doors help to create a fully customizable facility of any size at a significant savings over conventional construction.

AGRICULTURAL

With many years of experience serving the agricultural industry, Stand Fast steel buildings have become known for their strength and durability.

This experience has resulted in a steel building that is ideal for housing and protecting equipment, grain and livestock from the harshest weather conditions. Stand Fast steel buildings give farmers a total sense of security because they know their valuable investments will be safe and protected from the environment for years to come.

Farmers can count on personalized service from the moment they inquire about a Stand Fast steel building. Our technicians respond to your inquiry, discuss your needs and price your building to your specifications within 24 hours. You can be assured that your service representative will guide you through the entire project from the initial purchase to completion.

GARAGES

Stand Fast Buildings are an economical and versatile option that will keep your possessions dry, clean and in good condition.

Pre-engineered steel buildings require a lower initial investment, lower maintenance costs once built. Steel buildings are also an environmentally friendly choice because all materials can be recycled.

Our clear span construction allows for a variety of uses such as garages, workshops, storage facilities and even commercial and light industrial uses.

Stand Fast Buildings are designed and built to withstand severe weather conditions. Insurance costs are also typically lower on a steel building as compared with traditional construction.

STRUCTURE

The virtually maintenance free solid steel I-beam all steel building structure of our pre-engineered steel buildings ensures stability, strength and durability, and our prefabricated metal buildings are resistant to weather and rust. Whatever Mother Nature has to offer, our metal buildings can withstand the worst and the buildings are perfect for a variety of building applications.

Stand Fast utilizes Industrial Steel I-Beam Rigid Frames. This design provides for widths of up to 200 ft. Clearspan and over 1000 ft. with interior columns. The length can be unlimited depending on your application.

The primary and secondary framing is pre-cut, pre-drilled, and pre-welded for easy construction in the field. Detailed, stamped, certified engineer drawings and erection manuals are provided for every building.

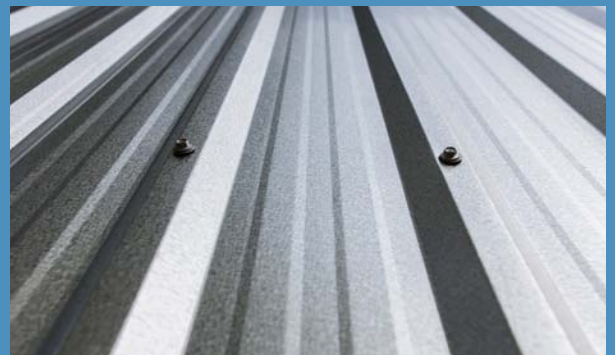

OPTIONS

Roof Options

PBR roof panels are made of 26-gauge, 80,000 psi AZ55 Galvalume® and colored panels are coated with AkzoNobel TRINAR® (KYNAR 500®/HYLAR 5000®), energy efficient, sustainable metal finishes. Architectural and trapezoidal standing seam roofs are also available in a variety of popular colors. Stainless steel capped fasteners come with a lifetime rust warranty.

Complete Trim Package

Stand Fast provides a complete trim package to enhance the beauty of their steel buildings. This package includes J trim to cover cut edges of wall panels around door openings, jamb covers for galvanized jambs and a header cover for galvanized headers. This trim matches the trim on the remainder of the building and is supplied at no extra charge.

Base Trim Package

The base trim package that comes with every Stand Fast steel building system completely seals the bottom of the building against leaks. This trim matches the trim on the remainder of the building and is supplied at no extra charge.

WHY STAND FAST?

Stand Fast Building Systems, Inc. exemplifies its commitment to quality through the use of advanced computer technologies and precision machinery. Automation and CNC technology enable the factory to produce higher quality components in less time at a very competitive price.

WARRANTIES

25- Year Perforation Warranty

Stand Fast's roof coating is AZ55 Galvalume and requires no maintenance or painting to retain its original luster. It is comprised of 55% aluminum, 44% zinc and 1% silicone with the greater aluminum content creating a higher resistance to rust. There is a 25-year rust-perforation warranty on the roof backed by the steel mills.

40-Year Warranty

The paint manufacturer and Stand Fast offer a 40-year warranty against chipping, cracking, peeling or blistering on wall panel paint. The paint is siliconized polyester over a substrate-galvanized coating providing further protection against rust.

50-Year Structural Frame Warranty

There is a 50-year warranty on the main and secondary structural frames including galvanized girts and purlins, eave struts and base angles.

Lifetime Stainless Steel Fastener Warranty

Engineered for rapid drilling, Stand Fast's self-drilling stainless steel capped fasteners, supplied with an assembled neoprene washer, carry a lifetime warranty against rust. The fasteners provide a watertight seal, are composed of 18 parts chrome and eight parts nickel and do not rust or tarnish.

Stand Fast takes great pride in cutting excess costs without cutting corners on workmanship and the quality of the materials that go into making their steel buildings. All Stand Fast steel building systems backed by a 25-year perforation warranty from the steel mills and made from 100% US steel.

Stand Fast manufactures an average of over 1400 buildings a year for a wide variety of markets. Technology and years of experience allow them to pass substantial savings to you and your customer.
